Activity-3

Progress Check-in Presentation MVP-1

Tejal Patel,

Student ID- 200460103

Project Introduction

- In this project, I am going to develop the website named "Land Locator" for the people who do not acquire land and they want to do agricultural activities. Through this portal, they can search location of the land on rent or lease by the details provided by the land owner.

- United Nations Sustainable Development Goals:

  Goal-2 : Zero hunger

  Goal-12 : Responsible consumption and production

Status Description:

Green State

- Till now, I have completed the design of main page, about us page and Featured listings page. This are just static pages now because I have not connected it with the database.

- For the database, I am using PostgreSQL and pgAdmin.I have started working on database so database connectivity has been established with the Django framework.

Next Enhancement:

- Implementing the database with the front end pages which will display data on it.

- Inter-linking of the applications.

- In upcoming weeks, I will develop feature of "Add a Listing" with its webpage design and database.

Scrum Dates:

- Start date: May 27, 2021

- End date: June 2, 2021

Project Changes:

- There is no changes in any features of this project as of now.

- I just change the databse framework. Very first, I decided to use built-in Django databse framwork "SQLite" but now I will use postgreSQL and pgAdmin.

Project Issues:

- There is no major issue found in the work till this day.

Project Demo:

- Demo of this pages.
- I have started working on the database. [code]

For this project, I follow this github account:

Reflection

- Do you feel "on track"?

Yes, I have done designing of important pages. I just have to connect it with database.

- What progress do you particularly feel good about?

I feel great that I have completed the page desings for which I was worried initially.

- What barries do you feel are a current impediment to success?

There are not major barries but the only thing that I have to link applications with each other for functionalities.

Reflection

- What help required to move positively forward?

The only thing that needed now is to stay positive and complete the work within the deadlines.

- What questions or concerns do you have?

I do not have any questions related to project till now.

Thank You
